Financial Needs; Junior Colleges; Money Management

ABSTRACT

This report summarizes information relating to the financing of operations of Illinois public community colleges for the fiscal year 1973. Some information is also included on fiscal year 1974 financing. The basic purposes are: (1) to provide officials of individual colleges with summary and comparative information; (2) to provide the Illinois Community College Board staff with data relevant to the development of statewide planning and budgeting; and, (3) to provide often-requested financial information to the many state agencies, boards, commissions, and committees which are concerned with the financing of higher education. The report is divided into four separate parts and contains the following data: Part I-Summary and Overview; Part II-Revenue Data; Part III-Expenditure Data; and Part IV-Appendices. (Author)

PREFACE

This report summarizes information relating to the financing of operations of Illinois public community colleges for the fiscal year 1973. Some information is also included on fiscal year 1974 financing. The basic purposes of the report are:

1. to provide officials of individual colleges with summary and comparative information, thereby assisting them in their individual evaluative and planning processes;
2. to provide the Illinois Community College Board and its staff with data relevant to the development of statewide planning and budgeting; and,
3. to provide often-requested financial information to the many state agencies, boards, commissions, and committees which are concerned with the financing of higher education.

This report is divided into four separate parts and contains the following data:

Part I - Summary and Overview - audited statewide revenue, expenditure, and unit cost summary data for the three most recent fiscal years

Part II - Revenue Data - detailed audited revenue data for each individual community college district for fiscal year 1973, along with summary data for comparative purposes for the previous two fiscal years; and budgeted

Operating Finance Report
April, 1974

revenue data for each college--by source--

for fiscal year 1974;

Part III - Expenditure Data - detailed audited expenditure data for each individual community college district for fiscal year 1973, along with summary data for comparative purposes, for the previous two fiscal years; and budgeted expenditure data for each college--by object and function--for fiscal year 1974.

Part IV - Appendices - Back-up information which is necessary for validating calculations of many figures contained in Parts I, II, and III.

The tables, figures, and pages are numbered consecutively throughout the report and are identified in the Table of Contents on the following page.

JAMES M. HOWARD, Associate Secretary for Budgets
BERNARD L. WAREN, Deputy Secretary for Finance
FRED L. WELLMAN, Executive Secretary

PART I

SUMMARY AND OVERVIEW

History of Operating Finance

In July, 1964, the Illinois Board of Higher Education (IBHE) published its first Master Plan. Among other things, this Master Plan set forth the basic framework for development of a public junior college system in Illinois. Its recommendations for financing the operations of the colleges within this system were:

1. "(The) State share (shall) be approximately 50% of average operating costs of the . . . system"
2. "Shares for individual institutions (shall) be determined by a flat grant of aid and/or an equalization grant based on the relative financial capabilities of the several junior college districts"
3. "Tuition (shall) not be charged to any Illinois resident"

In early 1965, Governor Kerner appointed a committee which included legislators of both parties, members of the IBHE, and lay representatives, to make recommendations to the General Assembly relative to the implementation of the Master Plan. The essence of their recommendations concerning the financing of public junior colleges was that, initially, only flat grants should comprise apportionment funding and that tuition should be optional.

The public junior college system came into existence by legislative enactment on July 15, 1965. This legislation set flat grant funding at the rate of \$11.50 per semester credit hour for Class I¹ junior colleges and \$9.50 per semester credit hour for Class II² junior colleges. These levels of funding and this method of distribution were used during the 74th and 75th biennia (fiscal years 1966 through 1969).

¹Public junior colleges which were either formed under the Illinois Public Junior College Act of 1965 or were in existence at that time and met certain minimal population and assessed valuation criteria and which levied a separate tax for junior college purposes.

²Public junior colleges not meeting Class I criteria and not levying a separate tax for junior college purposes. Class II colleges no longer exist.

Prior to development of a fiscal year 1970 budget request, an increase in the flat rate grant was recommended by the Illinois Junior College Board (IJCB). budget request was to be developed on the basis of a \$15.50 per semester credit hour flat rate grant. The IBHE agreed to recommend the total amount generated by the \$15.50 flat rate but requested that the IJCB develop a formula for distributing this amount both as flat rate grants and equalization.

Several equalization formulas were developed by the IJCB staff. After a series of hearings, one was selected and recommended by the Executive Secretary of the IJCB. The Governor agreed to recommend a flat rate grant increase from \$11.50 to \$15.50 but asked that equalization be deferred and given further study. The \$15.50 per semester credit hour was enacted for distribution in fiscal year 1970. (Since Class II junior colleges no longer existed, the flat grant rate for such colleges was no longer applicable.) The \$15.50 rate was maintained for fiscal year 1971. No equalization funding plan was adopted.

During the fall of 1969 the IBHE formed the Advisory Committee on Financing Junior Colleges to give further consideration to financing plans. The Committee's official report was presented to the IBHE in September, 1970. Included in the report was a recommendation to amend the apportionment method and include equalization along with flat grant funding. The IBHE agreed to the concept of a combination flat grant and equalization funding but altered the amounts and the equalization funding method.

The funding plan actually adopted by the 77th General Assembly for fiscal year 1972, although slightly different from both that of the Advisory Committee and the IBHE, maintained a flat rate grant (\$15.50 per semester credit hour) and added \$1.05 million total equalization funding to be apportioned to certain qualifying districts.

In fiscal year 1973 the flat rate grant was increased to \$16.50 per semester credit hour and an additional \$2.50 was funded for each credit hour in non-business occupational programs. Equalization funding was retained and increased to a total of \$1.4 million. Grants were also provided for approved Public Service and Disadvantaged Student projects (\$.75 and \$1.4 million respectively).

During the current fiscal year (1974), flat grants are paid at a rate of \$18.50 per semester credit hour and supplemental non-business occupational grants have increased to \$5.00 per semester credit hour. A small amount, \$78,600, has been appropriated for the first time for instruction of inmates at correctional institutions. Equalization funding (\$2.22 million) and special categorical funding for Disadvantaged Students (\$.75 million) and Public Service (\$1.4 million) continue, although the funding bases have been altered somewhat (see pages 24-26, 28, and 30).

A budget has been proposed for fiscal year 1975 which is based on (1) an increase in the flat grant to a \$19.20 rate, (2) an increase in the supplemental non-business occupational grant to a \$5.80 rate, (3) an increase in equalization funding to \$2.85 million, (4) an increase in funding to correctional institutions to \$100,000, and (5) funding for Public Service and for Disadvantaged Students at the same level appropriated for fiscal years 1973 and 1974.

A complete history of appropriations to the Illinois Community College Board, both for expenses of the central office and for distribution to the colleges in the system, is summarized in Table 1.

^aThese figures changed to \$69,300, \$1,200,000, \$1,530,000, and \$100,000 respectively via passage of SB 1184 (transfer bill)
^bIncludes \$237,000 for leasing, insuring, and equipping a physical facility
^cSpecial appropriation for equipment at Malcolm X College
^dSpecial appropriation for equipment at Kennedy-King College

Explanation of Current Operating Finance

Illinois public community³ colleges receive their revenue from a variety of sources, but principally through state apportionment, local taxes, and student tuition. Table 2 is intended to summarize all significant sources of revenue for community colleges. The table identifies the source of the revenue, the form in which the revenue is distributed, the agency through which the funds are distributed, an explanation of or basis for distribution of the funds, and an approximate amount that each source contributed for fiscal year 1973. The sources of revenue are arranged in order from the largest to the smallest contributor to the community college system during fiscal year 1973.

³The term "community" replaced "junior" by legislative enactment beginning with the fiscal year 1974 (July 1, 1973).

Illinois Community College Board
TABLE 2

SOURCES OF REVENUE USED TO FINANCE ILLINOIS PUBLIC COMMUNITY COLLEGE OPERATIONS
(Listed in order from largest to smallest source in FY 1973)

<u>Source of Revenue</u>	<u>Form of Revenue</u>	<u>Agency Responsible for Distribution</u>	<u>Explanation of or Basis for Distribution of Revenue</u>	<u>Amount of Revenue Contributed in FY 1973 (In Millions)</u>
Local districts	Property taxes	(Direct to college)	Payments by county treasurers directly to the districts	\$ 71.9
State appropriation	Flat rate apportionment grant	Illinois Community College Board (ICCB)	\$16.50 b /semester credit hour or equivalent carried through mid-term for courses leading to a degree or certificate	54.2
Students ^a	Tuition	(Direct to college)	Individual districts determine amounts, if any	25.2
State and federal appropriations	Reimbursement for approved Vo-Tech programs & for Vo-Tech equipment	Division of Vocational & Technical Education (DVTE)	\$7.50, 4.50, or 2.25/semester credit hour or equivalent for approved Vo-Tech courses, depending upon the priority category in which the program is placed; also some supplemental funding is possible which varies according to the relative wealth of the district; also funding for approved Vo-Tech equipment	6.9
High school dists., unit dists., & local common college dists.	Chargebacks	(Direct to college)	Reimbursement by common school dist. in non-community college territory or by another community college dist. for students not residing in but attending a community college dist. (See Appendix E for amounts and method of calculation)	5.8
State appropriation	Reimbursement for tuition & fee waivers	Ill. State Scholarship Commission (ISSC)	Tuition and fee waivers are reimbursed to colleges for approved regular & veteran students (See Appendix D for amounts)	5.4
State appropriation	Reimbursement for tuition & fee waiver b for some other minor expenses	Office of the Superintendent of Public Instruction (OSPI)	Generally speaking, this funding is for students in adult education and for welfare recipients to reimburse tuition and fees waived by the college. Also paid are certain transportation, child care, etc., costs for welfare recipients	3.0
Federal appropriation	Project grants	Various federal agencies	For approved programs dealing with environment, manpower training, etc.	1.8
Students ^a	Instructional fees	(Direct to college)	Individual districts determine amounts, if any	1.5
State appropriation	Supplemental non-business Vo-Tech apportionment grants	ICCB	\$2.50C /semester credit hour or equivalent carried through mid-term for non-business Vo-Tech courses leading to a degree or certificate— Given in addition to regular (\$16.50) flat grants	1.5
State appropriation	Disadvantaged student project grants d	ICCB	For approved projects which were designed to remediate problems inherent with disadvantaged students	1.4
State appropriation	Equalization apportionment grants	ICCB	Given to districts whose tuition & fees plus a figure obtained by multiplying its equalized assessed valuation per in-district FTE student by 17.45c (.001745) does not produce \$750 (in that amount)	.9
State appropriation	Public service project grants	ICCB	For approved projects which were designed to provide non-instructional types of educational & cultural experiences for community citizens, i.e., concerts, tours, lectures, etc.	.7

^aA portion of these funds actually come from the ISSC and OSPI for scholarships

^bIncreased to \$18.50 for FY 1974

^cIncreased to \$5.00 for FY 1974

^dDistributed on both a formula and project basis during FY 1974

^eChanged to 12c for FY 1974

Summary of Fiscal Year 1973 Audited Revenues

The various sources and amounts of total statewide revenue for the past three fiscal years are summarized in Table 3 and Figure 1.

Revenue from all sources for all Illinois public community colleges totaled nearly \$171 million during fiscal year 1973. This compares with \$130.5 million, \$139 million, and \$144 million for the fiscal years 1970, 1971, and 1972 respectively. The major sources of revenue for fiscal year 1973 were local taxes, including chargebacks, at \$77.7 million (45.5%), all state funds at \$59.5 million (34.8%), and student tuition and fees at \$26.7 million (15.6%). The remaining sources contributed \$7 million (4.1%). Local taxes, state funds, and student tuition and fees have been the major sources of revenue since the public community college system was created, and the percentages contributed by each have not differed appreciably during the three most recent years.

It should be noted that approximately \$5.4 million of the \$26.7 million contributed in the form of student tuition and fees actually was appropriated through the Illinois State Scholarship Commission and therefore did not come directly out of the students' pockets. An undetermined amount also came through the Office of the Superintendent of Public Instruction.
be considered "state" funds.

Some shift from governmental revenue (state and local taxes) to student tuition and fees as a source of revenue was evident during the four fiscal years. However, this trend is not expected to continue, since an increasing proportion of revenue is projected to come from state sources during fiscal year 1974.

FIGURE 1

Illinois Community College Board

STATEWIDE TOTAL AUDITED REVENUES FOR ILLINOIS PUBLIC
COMMUNITY COLLEGES FOR THE FISCAL YEARS 1971 THROUGH 1973

Summary of Fiscal Year 1973 Audited Expenditures

The largest portion of the \$162.6 million in total statewide expenditures for the fiscal year 1973 was for the category "Instruction". It is also noteworthy that the percentage of funds spent for instruction has steadily decreased during the three fiscal year period, i.e., from 60.1% in fiscal year 1971 to 58.2% in fiscal year 1972 to 57.7% during fiscal year 1973, although this trend is not expected to continue.

Comparisons between expenditure categories for the fiscal years 1971 and 1972 would be invalid, since the scope of certain categories was modified, while other categories were simply renamed.

Comparisons between fiscal years 1972 and 1973 are more valid. Of particular note are a decrease from 8.5% to 6.6% in "General Administration" and an increase from 10.5% to 12.0% in "Operation and Maintenance". However, direct comparisons should be tempered with the knowledge that some discretion still exists with college officials in terms of allocating costs.

There may be a temptation to infer from a comparison of Tables 3 and 4 that the colleges spent nearly \$8.5 million less than they received during fiscal year 1973, thereby creating a surplus of funds. Such is not the case. An apparent surplus one year is almost certain to be counterbalanced by an apparent deficit the next year. This is because expenses incurred in any one fiscal year are not always paid from funds received during that same fiscal year, e.g., Illinois Board of Vocational Education and Rehabilitation funds are often received during the fiscal year following the one in which the expense was incurred. Also contributing to the reported excess of revenues over expenditures are (1) chargeback revenue figures are inflated because of the duplication resulting when districts pay chargebacks to each other and the gross--not net--chargeback revenues are reported, and (2) revenue is often accumulated in the Building Maintenance Fund and transferred to a Site and Construction Fund for deferred, rather than immediate, expenditure.

Illinois Community College Board

STATEWIDE TOTAL AUDITED EXPENDITURES FOR ILLINOIS PUBLIC
COMMUNITY COLLEGES FOR THE FISCAL YEARS 1971 THROUGH 1973

Summary of Fiscal Year 1973 Unit Costs for Instruction

A statewide summary of unit costs is presented in Table 5.

The average instructional cost per semester credit hour for all instructional areas and all programs therein increased from \$48.07 in fiscal year 1972 to \$50.61 in fiscal year 1973 after decreasing from \$48.82 to \$48.07 between the fiscal years 1971 and 1972. When individual instructional areas are considered, one unit cost decreased, one increased, and two were reclassified in fiscal year 1973. "General Studies" decreased from \$50.03 to \$45.59, "Baccalaureate" increased from \$45.02 to \$48.33, "Occupational" was subdivided into "Business" and "Non-Business", and "Adult and Continuing Education" was discontinued. The overall increase in unit cost in fiscal year 1973 is undoubtedly tied to an inflationary economic situation; however, inflation was also operating in fiscal year 1972, when a decrease took place. It seems apparent, therefore, that unit costs are as much a function of funds available as they are of economic fluctuations. This is not to suggest that colleges will spend additional funds needlessly--it does suggest that programs and services are determined by educational prudence as well as fiscal prudence. In other words, when funds are available, desired educational practices are utilized--when funds are not available, less desirable educational practices must often be utilized. Educators and people controlling revenue allocations have always disagreed as to where these two opposing forces should strike a balance.

Also included in Table 5 are data on statewide average unit costs of the various programs within instructional areas. Since a number of the programs were reclassified in fiscal year 1973, comparison is somewhat limited.

PART II

REVENUE DATA

Introduction

This section of Operating Finance Report presents detailed audited revenue data, by district, for fiscal year 1973 and one summary table of budgeted revenue data, by district, for fiscal year 1974. The general format of this section is that data are presented in summary form initially and the scope is narrowed in each subsequent table by providing increasingly detailed data. For example, initially all revenue is summarized; following this is a summary of all state sources of revenue; then detail is provided on flat rate grant state apportionment revenue.

Several limitations should be noted concerning data in this section. For example, several districts did not submit the required Uniform Financial Statement along with their audits. Therefore, "blanks" appear in some tables and several column totals are necessarily incomplete. An attempt was made to obtain the missing data for some districts from other sources, and in some cases a reasonable estimate was made.

Another problem which could not be satisfactorily resolved was the matter of duplication of chargeback revenue between districts, which amounts to at least several hundred thousand dollars. For example, if District "A" pays \$10,000 in chargebacks for their students attending District "B" and District "B" pays \$5,000 in chargebacks for their students attending District "A", the total chargeback revenue for the two districts would be reported in this section as \$15,000. Since the present reporting system does not provide a method of identifying the precise amount of duplication, no attempt was made to subtract that amount. Therefore, total chargeback revenue reported as being \$5,777,699 in Table 6 is gross, not net, revenue.

Analysis of Fiscal Year 1973 Audited Revenues
for Operations--By Source--in Illinois Public Community Colleges

Table 6 provides a detailed breakdown of revenue sources for each individual community college district. It should again be noted that several colleges did not submit the required Uniform Financial Statement with their audits; therefore, some figures used in this table were either estimated or omitted entirely. This situation also resulted in disagreement among figures appearing in different tables, e.g., the Division of Vocational-Technical Education (DVTE) reports total reimbursements to community colleges of approximately \$6.9 million (see Table 16), whereas the combined DVTE (vocational education) figures in Table 6 total only about \$4.4 million. However, total revenue figures do represent an accurate picture of the gross revenue available to each district during the fiscal year 1973.

It should be noted that the City Colleges of Chicago were in the process of converting from a January 1-December 31 to a July 1-June 30 fiscal year during this reporting period. As a result, they reported revenue for an 18-month period--January 1, 1972-June 30, 1973. Since no breakout was provided as to the amount of revenue received during the period of January 1-June 30, 1972 nor during the regular July 1, 1972-June 30, 1973 fiscal year, the staff simply allocated two-thirds of the total revenue for the 18-month period to the regular fiscal year.

Audited revenues for fiscal year 1973 totaled approximately \$171 million. Nearly one-half (45.5%) of this amount was raised locally, either through direct taxation or through chargebacks received for students attending, but not living in, the district. Another one-third of the revenue came directly from distribution through the Illinois Community College Board, primarily in the form of flat rate grants. Another one-sixth of the revenue is received in the form of student tuition and fee charges. The remaining amount was obtained from federal or other state sources.

Source of Data: Illinois Public Community College Audit Reports submitted to the ICCB

Total Revenue from State Sources
for Illinois Public Community Colleges--Fiscal Year 1973

Table 7 provides more detailed information on all sources of state revenue received by the community colleges during fiscal year 1973. It can be seen that revenue is available to community colleges through state appropriations to four separate agencies--the Illinois Community College Board, the Illinois Board of Vocational Education and Rehabilitation, the Illinois State Scholarship Commission, and the Office of the Superintendent of Public Instruction.

Of the total of \$70.4 million from all state sources, the ICCB distributed approximately \$58.6 million. The majority of this was in the form of flat rate grant apportionment funding (\$54.2 million). During fiscal year 1973, flat rate grant apportionment funding was based on \$16.50 per semester credit hour. This rate has been increased to \$18.50 for the fiscal year 1974 and is proposed at \$19.20 for the fiscal year 1975.

Non-business occupational apportionment funding was based on \$2.50 per semester credit hour in fiscal year 1973, the first year in which such grants were provided. The funding rate has increased to \$5.00 during fiscal year 1974 and is proposed at \$5.80 for fiscal year 1975.

Equalization apportionment grants were based on a tax rate of 17.45¢ and a "foundation" level of \$510 in fiscal year 1973. These qualifying rates were changed to 12¢ and \$440 in fiscal year 1974 and proposed at 12¢ and \$460 in fiscal year 1975. (See pages 24-26 for a further explanation of equalization funding.)

Two funding methods are being utilized during fiscal year 1974 that were not utilized in fiscal year 1973: (1) \$7.50 is funded for each community education unit, i.e., 30 contact hours (in addition to community service project grants), and (2) an amount is funded for approved disadvantaged student projects which is determined on a pro rata basis according to past district participation in federally financed disadvantaged student programs. (An additional amount may be obtained for certain projects on an individual basis as in the past.)

Flat Rate Grant Apportionment Claims Paid by the ICCB
During Fiscal Year 1973 to Illinois Public Community Colleges

Table 8 summarizes flat rate grant apportionment funding--by term and in total for fiscal year 1973 and in total only for the two previous years.

Flat rate grant apportionment funding has increased steadily from \$41.9 million in fiscal year 1971 to \$47.6 million in fiscal year 1972 to \$54.2 million in fiscal year 1973. A portion of this increase is due to increased enrollments, but the increase between fiscal years 1972 and 1973 of \$6.5 million was also due in part to a rate increase from \$15.50 per semester credit hour to \$16.50. Flat rate grant apportionment funding has been increased to \$18.50 for fiscal year 1974 and is proposed at \$19.20 for fiscal year 1975.

The following is a summary of Table 8 and presents information for the most recent three-year period during which audited data were available.

A Three-Year Summary of Flat Grant Funding

	<u>Fiscal Year 1971</u>	<u>Fiscal Year 1972</u>	<u>Fiscal Year 1973</u>
Total Funding	\$ 41,925,251	\$ 47,638,799	\$ 54,188,598
Flat Grant Rate	\$15.50	\$15.50	\$16.50

Supplemental Non-Business Occupational Apportionment Claims
Paid by the ICCB During Fiscal Year 1973
to Illinois Public Community Colleges

The 77th General Assembly, in appropriating \$1.25 million in supplemental grants for non-business occupational courses, recognized that higher unit costs are involved in providing such courses. These courses were reimbursed at a rate of \$16.50 (regular flat rate grant) plus an additional \$2.50 for supplemental grants, for a total of \$19.00 per semester credit hour. The fiscal year 1974 supplemental rate has increased to \$5.00 per semester credit hour and \$5.80 is being proposed for fiscal year 1975.

It will be noted that the \$1.25 million appropriation for FY1973 was not sufficient to cover all non-business occupational claims, since such claims totaled nearly \$1.5 million. Therefore, an additional amount had to be transferred from other ICCB appropriation line items to cover the additional claims. It would appear at this time that the \$3 million appropriated for FY1974 will also be insufficient to pay all claims. Approximately \$300,000 will probably be requested for transfer from other ICCB appropriation line items to cover the deficit. One purpose of providing supplemental payments for non-business occupational courses was to increase enrollment in such courses and it appears that such an increase has been realized.

The following is a summary of supplemental non-business occupational funding for FY1973.

Summary of FY1973 Non-Business Occupational Funding

	<u>Summer 1972</u>	<u>Fall 1972</u>	<u>Winter 1973</u>	<u>Spring 1973</u>	<u>Total</u>
Total Funding	\$102,940	\$644,310	\$92,242	\$642,728	\$1,482,220
Supplemental Funding Rate	\$2.50	\$2.50	\$2.50	\$2.50	\$2.50

Equalization Apportionment Claims Paid by the ICCB
During Fiscal Year 1973 to Illinois Public Community Colleges

The 77th General Assembly appropriated \$1.4 million for special assistance (equalization) funding to qualifying districts for fiscal year 1973. In actuality, only \$.86 million was paid, since two districts scheduled to receive large payments received reduced amounts because of their failure to raise the qualifying local contribution (local taxes and student tuition and fees). The 78th General Assembly appropriated \$2.22 million for equalization funding for fiscal year 1974, while more than \$2.8 million is being requested for fiscal year 1975.

The concept of equalization recognizes that not all districts have the same relative ability to obtain revenue from local sources (primarily local taxation). It further recognizes that some districts are sufficiently less capable of obtaining local revenue so that students in such districts are denied equal access to educational opportunity. It is therefore perceived to be the duty of the state to at least partially "equalize" this access through higher per-student funding to low-access districts. An actual example of inequitable access should illustrate:

<u>Equalized Assessed Valuation (EAV)</u>	<u>No. of In-District Full-Time Equivalent Students (FTE)</u>	<u>EAV/FTE</u>	<u>Operating Tax Rate</u>	<u>Operating Funds Raised Locally Per FTE</u>
Dist. X \$1,584,769,000	2,134	\$742,628	20¢	1,485
Dist. Y 427,031,000	2,211	193,139	25¢	483

It can be seen that District "X" has nearly four times as much assessed valuation behind each student as does District "Y" and by levying at a lower operating tax rate can still raise more than three times as much revenue per student. In fact, District "X" would need a tax rate of only 6.5¢ to raise the same amount of revenue raised by District "Y" at a rate of 25¢.

It would be difficult to justify equal state support (on a per student basis) to each of these districts if one subscribes to the "equal access" theory, even granting that differing assessment practices among districts could be partially responsible for the inequity.

The equalization formula is based on the principle that if each district were to levy at the same operating tax rate (exert equal "effort"), each should be guaranteed at least a minimum amount of revenue per student (sometimes called the "foundation" level) and that this guaranteed foundation, plus student charges, should provide one-half the statewide average operating cost per student.

Eligibility (and the amount for which a district is eligible) was calculated as follows for fiscal year 1973:

$$EG = [C/2 - (LR + T \text{ and } F)] E$$

where:

EG = equalization grant

C = statewide average operating cost per FTE student

LR = local revenue (tax rate X EAV/in-district FTE)

T and F = tuition and fees

E = enrollment (in-district FTE students)

An example should illustrate:

given:

EAV of District X = \$400,000,000

In-district FTE students = 2,000

EAV/in-district FTE = \$200,000

Projected in-district FTE = 2,100

Statewide average yearly

operating cost per student = \$1,500

Qualifying tax rate = 17.45¢

Qualifying student

tuition and fees = \$240

then:

$$EG = [C/2 - (LR + T \text{ and } F)] E$$

$$EG = [1500/2 - (.001745 \times 200,000 + 240)] 2100$$

$$EG = [750 - (349 + 240)] 2100$$

$$EG = [750 - 589] 2100$$

$$EG = 161 \times 2100$$

$$EG = \$338,000$$

A more common method of calculation is to subtract the \$240 from the \$750 first, which yields a "foundation" tax revenue figure of \$510. A district's EAV/in-district FTE is then multiplied by .001745 and any deficiency below \$510 per student is funded in the form of equalization grants. The formula allows tax revenue beyond that obtained at a 17.45¢ rate to be substituted for tuition and fees below \$240 and, conversely, for tuition and fees above \$240 to be substituted for tax money obtained at a rate below 17.45¢. If a district does not raise the full qualifying amount (\$750) in the manner indicated, its equalization will be reduced by the amount of the difference between the actual local revenue raised per student and the full qualifying amount.

The formula remains basically the same for fiscal year 1974 and is proposed to remain basically the same for fiscal year 1975 except that certain qualifying rates have changed. The 17.45¢ was lowered to 12¢ for both fiscal year 1974 and 1975 and the "foundation" tax revenue figure changed from \$510 to \$440 in fiscal year 1974 and \$460 for fiscal year 1975. Examples of calculations for fiscal year 1974 and 1975 follow.

given:

EAV of District X	= \$400 000 000
In-district FTE students	= 2 000
EAV/In-district FTE	= \$200 000
Projected in-district FTE	= 2 100
Statewide average yearly operating cost per student	= \$1 360 (74); \$1 500 (75)
Qualifying tax rate	= 12¢
Qualifying student tuition and fees	= \$240 (74); \$290 (75)

FY 1974

then:

$$\begin{aligned} EG &= [C/2 - (LR + T \& F)] E \\ EG &= [1360/2 - (.0012 \times \$200,000 + 240)] 2100 \\ EG &= [680 - (240 + 240)] 2100 \\ EG &= [680 - 480] 2100 \\ EG &= 200 \times 2100 \\ EG &= \$420 000 \end{aligned}$$

FY 1975

then:

$$\begin{aligned} EG &= [C/2 - (LR + T \& F)] E \\ EG &= [1500/2 - (.0012 \times 200,000 + 290)] 2100 \\ EG &= [750 - (240 + 290)] 2100 \\ EG &= [750 - 530] 2100 \\ EG &= 220 \times 2100 \\ EG &= \$462 000 \end{aligned}$$

Public Service Project Grants Awarded
to Illinois Public Community Colleges During Fiscal Year 1973

Funds for public service grants were appropriated in the amount of \$750,000 for fiscal year 1973. These funds were distributed to districts on the basis of approved project applications. An actual total of \$732,660 was allocated to such projects. Public service funds were again appropriated at the \$750,000 level for fiscal year 1974 and are recommended at that same level for fiscal year 1975.

Current (FY 1974) public service funding has been divided into two parts:

(1) Community Education apportionment grants, distributed at the rate of \$7.50 per Community Education unit (30 contact hours), which are estimated to cost approximately \$450,000, and (2) Community Service project grants, distributed on an approved project basis, which are estimated to cost approximately \$300,000. A similar funding mechanism is being proposed for fiscal year 1975.

Public service grant funding is an outgrowth of a change in program philosophy which essentially divided the former instructional area category of Adult and Continuing Education into either General Studies (credit courses eligible for flat grant apportionment funding) or Public Service (non-credit courses and activities which are not eligible for flat grant funding). The Public Service category was then subdivided into the two categories named above: Community Education, which consists of instructional or classroom-like activities of a non-credit nature, and Community Service, which consists of activities of a non-instructional nature, such as concerts and tours.

Disadvantaged Student Project Grants Awarded
to Illinois Public Community Colleges During Fiscal Year 1973

Disadvantaged student grants received an appropriation amounting to \$1.4 million for fiscal year 1973. These funds were distributed on an approved project basis. Another \$1.4 million was appropriated for fiscal year 1974 and is being likewise proposed for fiscal year 1975.

The current (FY 1974) disadvantaged student project funds are divided into two categories:

(1) those which are apportioned on a pro rata basis (when projects are approved), depending upon the district's receipt of federal program monies for disadvantaged student projects during fiscal year 1973, which is estimated to cost approximately \$1 million, and

(2) those which are awarded on an additional approved project basis, estimated to cost about \$400,000.

A similar division and allocation of funds is proposed for fiscal year 1975.

Illinois State Scholarship Commission Disbursement
to Illinois Public Community Colleges for the Fiscal Years
1971 Through 1973--Regular Monetary Awards

Table 13 summarizes the disbursement of funds to colleges by the Illinois State Scholarship Commission for tuition and certain instructional fees for qualifying students. These funds are not appropriated to the ICCB, nor does the ICCB process such claims.

The total amount of funding has increased steadily during the three-year period from \$.96 million to \$2.3 million. An even larger amount is anticipated for the fiscal year 1974 because of (1) increased enrollments, and (2) eligibility for the first time of half-time students.

The Regular Monetary Award Program of the ISSC has been developed to provide financial assistance to students showing financial need. Monetary awards are designated for students but are actually provided to the colleges in the form of reimbursement for waived tuition and fees when confirmation of the student's enrollment is received.

The following is a summary of Table 13 and indicates total ISSC funding for Regular Monetary Awards and number of participants for the fiscal years 1971-1973.

Illinois State Scholarship Commission Disbursement
to Illinois Public Community Colleges for the Fiscal Years
1971 Through 1973--Veterans Scholarships

In addition to the Monetary Award Program, the Illinois State Scholarship Commission also provides reimbursement for tuition and certain fees of military veterans. The colleges will receive funds from the ISSC (processed through the ICCB) for tuition and fee waivers for all eligible military veterans. This funding has increased from \$2.6 million in fiscal year 1972 to \$3 million in fiscal year 1973.

Veterans scholarship funding is not based on financial need of the recipient, but rather upon the recipient's completion of qualifying service in the armed forces of the United States. Such funds can be and are used to supplement G.I. Bill benefits.

The following is a summary of Table 14 and indicates total ISSC funding for Military Veterans Scholarships for the most recent audited three-year period.

Illinois Board of Vocational Education and Rehabilitation
Total Reimbursements and Reimbursements for Programs
for the Fiscal Years 1971 Through 1973

Community colleges received a total of \$6.1 million from the Illinois Board of Vocational Education and Rehabilitation--Division of Vocational Technical Education, for courses in approved occupational programs in fiscal year 1973. Funding totaled \$5.0 million in fiscal year 1971 and \$4.6 million in fiscal year 1972. Approximately 50% of the funds for distribution by IBVER were received from federal appropriations and the other 50% from state appropriations.

Funding by the IBVER to community colleges is similar to apportionment funding by the ICCB in that colleges receive a flat rate grant for programs (which is on a sliding scale depending upon a need priority) and may receive an additional amount based on their relative wealth or "ability to pay" (really an equalization concept). Generally speaking, a "highest priority" program receives a flat grant of \$7.50 per semester credit hour, "above average priority" programs receive \$4.50 per semester credit hour, and "average priority" programs receive \$2.25 per semester credit hour. Additional funds may be received for programs depending upon the equalized assessed valuation per in-district FTE student of the district (certified by the ICCB). Other factors, such as the extent to which disadvantaged students and handicapped persons are involved, are also considered when funding levels are determined.

Illinois Board of Vocational Education and Rehabilitation
Total Reimbursements to Illinois Public Community Colleges
for Fiscal Years 1971 Through 1973

Total reimbursement by the IBVER to the community colleges totaled \$6.9 million in fiscal year 1973. This represents an increase from \$5.8 million in fiscal year 1972 and from \$6.4 million in fiscal year 1971. "Total" reimbursement includes funding for programs (Table 15), special contracts, and equipment.

The following are summaries of (1) IBVER funding by type, and (2) total IBVER funding for the most recent three-year period as presented in Table 16.

Summary of IBVER Types of Funding for FY 1973

<u>Type of Funding</u>	<u>Amount of Funding</u>
Programs	\$ 5 970 800
Special Contracts	243 189
Equipment	589 622
Total	\$ 6 883 417

Monies Expended to Illinois Public Community Colleges
by the Office of the Superintendent of Public Instruction
During Fiscal Year 1973

The community colleges receive funding for certain programs from the Office of the Superintendent of Public Instruction. These funds totaled nearly \$3 million in fiscal year 1973, which is nearly three times the amount received in fiscal year 1971. The funds are basically for adult education and welfare recipient training. They are most often in the form of reimbursement for tuition and fees of approved adult and/or welfare students but also include some reimbursement for travel, child care, and similar expenses of welfare recipients.

The following is a summary of Table 17 and shows OSPI funding for the most recent three-year period.

Three-Year Summary of OSPI Funding

	<u>FY 1971</u>	<u>FY 1972</u>	<u>FY 1973</u>
Total Funding	\$1 026 408	\$2 305 408	\$2 971 984

Illinois Public Community Colleges--Revenue Received
From Local Sources During Fiscal Year 1973

Table 18 presents information on the amount and percentage of "local" involvement in financing operations in the community colleges. Just over three-fifths of all revenue comes from local sources (taxes, chargebacks, student tuition, and student fees). This varies by district from a high of 75.8% to a low of 41.7%, with the average being around 60%. Examination of Table 3 will confirm that, although the amount of funds raised locally has increased markedly during the past three years, the statewide average has held nearly constant at approximately 60%.

Two limitations should be noted in Table 18. First, there is the duplication of chargeback revenue problem previously explained on page 15. Secondly, the student tuition and fee revenue does not all come directly from the student. Approximately \$5.4 million comes in the form of scholarships through the Illinois State Scholarship Commission, and another undetermined amount comes in the form of scholarships through the Office of the Superintendent of Public Instruction. It would be misleading, therefore, to assume that student tuition and fee revenue had as its source only the student.

The following summary of Table 18 presents information on sources of "local" revenue.

Local Revenue Sources for FY 1973

<u>Revenue Source</u>	<u>Revenue Amount</u>
Local Taxes	\$ 71 880 350
Chargebacks	5 777 699
Student Tuition	25 230 261
Student Fees	1 493 961
Total	\$104 382 271

Source of Data: Illinois public community college audits

Local Taxes and Chargebacks Received by Illinois Public
Community Colleges During the Fiscal Years 1971 Through 1973

Two forms of "local" revenue (excluding student tuition and fees) are (1) the taxes collected on local property in the community college district, and (2) "chargebacks" received for students attending--but not living in--the district. These amounted to \$71.9 million and \$5.8 million respectively in fiscal year 1973.

Chargeback revenue comes from two sources: (1) common school districts (either high school or unit districts) not located in a community college district, and (2) other community college districts. At the present time, there are a large number of common school districts which are either located totally, or in part, outside community college district boundaries. Students living in these areas are permitted to attend public community colleges and the common school district from which they come must pay their "chargeback" (the amount of money which the community college would receive in taxes if that student were living in the district--see Table 36 for the method of computing such charges). This funding may decrease significantly for fiscal year 1975 since all territory within the State is required to be assigned to a community college district at that time (they may vote to remain out). However, this loss should be countered by an increase in local taxes because of annexed territory.

The other source of "chargeback" revenue is from community college districts which send students to another community college district. (This is permissible if programs not available in the home district are offered in another district.) The fact that this \$5.8 million is not net revenue has been discussed on page 15.

Student Tuition and Fees Received by Illinois Public
Community Colleges During the Fiscal Years 1971 Through 1973

Table 20 presents "local" revenue received in the form of direct charges to students for tuition and fees. By statute, tuition may not exceed one-third of "per capita costs". The term "tuition" is used in two different ways in the statutes, and some distinction should be made between the two. As defined in Section 106-2 of the Illinois Public Community College Act, "tuition" is really synonymous with "chargebacks"--the responsibility of governmental units (school districts). As defined in Section 106-4, "tuition" refers to direct charges to students, which has the one-third of per capita cost limitation just mentioned. The latter is the "tuition" being considered in Table 20. (Also see Table 35 for a district breakdown of student tuition and fee charges.)

Perhaps as much as \$8 million of the total of \$25.2 million received in tuition during FY 1973 did not come directly from the student. Reimbursement to colleges for student tuition and fee waivers are a primary responsibility of the Illinois State Scholarship Commission. Such reimbursement is for regular students proving financial need and for military veterans. Also providing reimbursement to colleges for student tuition and fee waivers is the Office of the Superintendent of Public Instruction. This reimbursement is primarily for the tuition and fees of adult and/or welfare recipient students.

*A portion of this revenue comes through the ISSC (see Tables 13 & 14) and, to a lesser degree, the OSPI (see Table 17)

Analysis of Fiscal Year 1974 Budgeted Operating Revenues
--By Source--in Illinois Public Community Colleges

Community college officials have developed budgets for fiscal year 1974 totaling \$180 million statewide. However, these budgets were developed on the basis of an anticipated flat rate grant funding level of \$17.61 per semester credit hour rather than the \$18.50 rate which is currently in effect. (The flat grant rate was in question until legislative action in the late fall--after budgets had been developed.) Therefore, whereas budgets in the past have been somewhat in excess of actual revenue received, they may well be below actual revenue receipts for fiscal year 1974. For example, an underestimation is evident in the column labeled "ICCB Apportionment and Grants" where revenue is estimated at \$62 million. ICCB calculations show that approximately \$71 million should be available in this category.

A summary of Table 21--budgeted revenue, by source--follows.

Summary of Budgeted Revenue for FY 1974 By Source

<u>Source</u>	<u>Amount</u>

Source of Data: Fiscal year 1974 district budgets submitted to the ICCB

PART III

EXPENDITURE DATA

Introduction

Part III of this report presents detailed audited expenditure data for each district, by object and function, as well as a summary of unit cost data for each district, by instructional area, for fiscal year 1973. Also included are budgeted expenditure data for each district, by object and function, for fiscal year 1974.

Audited fiscal year 1973 expenditure data, like some of the revenue data in this report, are somewhat limited in that (1) not all colleges completed the required Uniform Financial Statement, and (2) the City Colleges of Chicago audit was based on 18 months rather than the 12-month fiscal year, since they were in the process of converting their fiscal year from a January 1-December 31 basis to a July 1-June 30 basis. Concerning the former limitation, an attempt was made to extract information from other college financial documents to fill in the "blanks". Concerning the latter limitation, the ICCB staff arbitrarily inserted figures which represented two-thirds of those provided for each expenditure function and object.

The unit cost data included in this section provide further detail (by district) to the summary of unit costs presented in Table 5.

Audited Fiscal Year 1973 Operating Expenditures
--By Function and By Object--in Illinois Public Community Colleges

A total of \$162.6 million was expended for community college operations during fiscal year 1973. Comprising the major portion of these expenditures was the "Instructional" function, which accounted for nearly three-fifths of all expenditures. The only other category comprising more than 10% of the total expenditures was "Operation and Maintenance" at 12%.

The accuracy of Tables 22 and 23 was somewhat impaired by the failure of several colleges to provide the Uniform Financial Statement and because of the need to convert City Colleges of Chicago figures to a 12-month fiscal year basis.

Column totals and percentages in Table 23 would not be very useful if they were related to the total expenditures of \$162.6 million, since the Chicago object classifications were not provided. (Chicago spends nearly one-fourth of all funds expended by the entire community college system). However, some useful estimates can be made by excluding Chicago from the "Total" column and by assuming that each Chicago object classification breakout would be approximately at the same ratio as for the state as a whole.

Excluding Chicago, the classification "Academic Salaries" is clearly the largest single expenditure object, at 53.8%. This, along with "Non-Academic Salaries", at 19.5%, yields a percentage for all salaries of 73.3%, or nearly three-fourths of all expenditures. Adding "Employee Benefits" (which are really fringe benefits or supplements to salaries) at 1.8%, does bring total compensation for employees to a three-fourths level. If "Travel", at 1%, and "Contractual Services", at 2.7%, are considered as payments or benefits to individuals, the total monies paid for all personnel nears 80%. The remaining 20% is for equipment, supplies, and various expenses of keeping the physical plant open and in good operating condition.

Fiscal Year 1973 Cost Per Credit Hour for Instructional Areas
in Illinois Public Community Colleges

Table 24 summarizes unit costs for each instructional area and for all areas combined, by district, for fiscal year 1973. It has been noted before (see page 13) that instructional area classifications have been amended so that a breakdown of occupational programs into Business and Non-Business is provided for the first time. Also, the Adult and Continuing Education area has been eliminated, and the courses formerly contained therein are now either in General Studies or Public Service. (The latter costs were not considered in this unit cost study.)

Unit costs for all instructional areas combined have increased in fiscal year 1973 to an average of \$50.61 per semester credit hour from \$48.07 in fiscal year 1972. Fiscal year 1972 had shown a decrease from the previous year's \$48.82 figure.

There has always been a temptation to compare unit costs in community colleges, particularly for baccalaureate programs, to those of senior institutions at the lower division (freshman and sophomore) level. Any such comparison should be tempered with the knowledge that (1) community college unit costs are not developed in exactly the same manner, e.g., some allocated costs are handled differently, some capital expenditures are not amortized in community colleges, and the universities base their unit cost calculations on tenth-day enrollments, whereas community colleges use mid-term enrollments, and (2) the method of delivering services is often vastly different, e.g., the universities frequently have large lecture classes of several hundred students or have low-salaried graduate student teaching assistants teaching courses at the lower division level.

Source of Data: Fiscal Year 1973 Unit Cost Study

Fiscal Year 1974 Budgeted Operating Expenditures
--By Function and Object--in Illinois Public Community Colleges

Tables 25 and 26 show budgeted expenditures for fiscal year 1975 totaling \$190 million, or approximately \$10 million more than anticipated revenues for that same year. However, as has been pointed out on page 48, total budgeted revenues were probably underestimated. Therefore, the ICCB staff is not anticipating a statewide deficiency of total funds--at least certainly not in the amount of \$10 million. (However, there could be deficiencies at any given college or in a given program statewide, as was the case with Supplemental Non-Business Occupational claims for fiscal year 1973.)

Because function and object classification breakouts were not fully provided by the City Colleges of Chicago, it is difficult to determine where increases and decreases in total system costs are expected to occur.

Tables 25 and 26 are summarized below.

Budgeted Operating Expenditures for FY 1974

<u>Function*</u>	<u>Amount</u>	<u>Object</u>	<u>Amount</u>
Instruction	\$ 76 888 318	Salaries	\$132 962 440

Source of Data: Illinois public community college budgets for fiscal year 1974

PART IV

APPENDICES

Introduction

The appendices contain "backup" data which are useful in substantiating calculations of data presented in the body of the report. For example, summary data on student tuition and fees are presented in the body of the report (Table 20)--Appendix D shows the cost per credit hour for student tuition and fees at each institution. Also included are more detailed data on enrollments, assessed valuations, tax rates, chargebacks, and equalization funding.

Some of the data in the appendices relate to fiscal year 1973, while other will relate more specifically to the current fiscal year (fiscal year 1974) or even to proposed fiscal year 1975 funding.
